

Flexibility for effective response to new customer requirements and market opportunities.

e on EPI *Leasing*

Currently more and more companies and professionals recognize the advantages of leasing and they seek new and advanced services especially concerning business cars.

Services that facilitate and automate the procedures of managing the company fleet, changing the leasing terms, managing various maintenance services (routine or occasional).

E-On Integration having a deep knowledge of the car retail industry has successfully responded by offering **e-On EPI Leasing**.

The application suite that covers the full range of the required functionality and gives a competitive advantage to a car leasing company of any size.

E-On EPI Leasing offers a web platform that enables the leasing company to enhance the services it provides to its customers, increasing their satisfaction and subsequently their loyalty.

It enables the leasing company to be agile and quickly respond to customer requirements and new market opportunities in order to deliver solutions and services in time, ahead of competition.

Real time collection and availability of information provides a precise image of the customers, their added value or the risks for the company and enables an effective customer relationship management.

Process Automation

Automation and full coverage of Sales and CRM functionality to manage customers and coordinate marketing activities.

Real time, on Line Information

Access to an integrated application platform that collects information across the business and enables for informed and faster decisions.

Enhanced Productivity

Eliminates all kinds of duplicate entries and reduces communication costs and manual procedures.

A Single Collaboration Environment

Within the company but also extended beyond to engage partners and customers. Integrated information about transactions and activities concerning customers across all business channels.

Embedded best business practices for the car leasing company.

The difference of e-On EPI Leasing from other similar workflow management applications is that it has been developed to incorporate best business practices of companies in the car leasing field. So the company gains from our collective experience since we provide various standards for transactions and processes. There is no need to start from zero base and customize a generic application in order to meet the specific requirements of the leasing business functionality.
